EXPERIENCE

WeSecure

2026 – Present

Developer

Chennai, India

- Designed and deployed **scalable systems and real-time pipelines** for large-scale data processing and analysis, demonstrating hands-on exposure to enterprise-level project execution.
- Built and optimized **backend systems and data infrastructure** using modern technologies, focusing on **performance improvement** and system reliability.
- Collaborated with cross-functional teams to deliver **impactful technical solutions** aligned with organizational objectives and industry best practices.
- Applied **problem-solving and technical competencies** to enhance system efficiency and drive measurable business outcomes.
- Demonstrated **learning agility** by quickly adapting to new technologies and methodologies in a dynamic work environment.

Eleet SRMIST & CodeKrafters

2023 – Present

Technical Lead

Chennai, India

- Led **full-stack project development** from conception to deployment, ensuring alignment with project goals and organizational values.
- Demonstrated **leadership competencies** by mentoring team members, coordinating efforts, and fostering a collaborative development culture.
- Implemented **secure, scalable architectures** for production systems, emphasizing code quality, maintainability, and best practices.
- Assessed team members on **performance and learning agility**, contributing to professional development and organizational growth.

Prompt InfoTech

2024

Cybersecurity Intern

Chennai, India

- Gained **hands-on exposure** to enterprise security operations and real-world threat assessment methodologies.
- Conducted **technical security assessments** and contributed to system hardening initiatives under industry mentorship.
- Developed practical understanding of **security frameworks and risk management** principles in a professional environment.

PROJECTS

Intelligent Monitoring and Analytics Platform [\[GitHub\]](#)

Python, Flask, REST APIs, Data Integration, Analytics Engine

- Built an **end-to-end analytics platform** integrating multiple data sources for real-time monitoring and actionable insights.
- Designed **scalable backend systems** with RESTful APIs for efficient data access and processing at scale.
- Implemented **data aggregation and analysis pipelines** to extract meaningful patterns and support strategic decision-making.
- Demonstrated **project performance** through system optimization and user-centric feature development.

Advanced Computer Vision and Data Processing System

Java, Python, System Design, Data Pipeline Architecture

- Developed **end-to-end data processing pipelines** for real-time information extraction and validation.
- Implemented **robust system architecture** with emphasis on scalability, reliability, and performance optimization.
- Applied **data validation and quality assurance** methodologies to ensure accuracy and consistency of outputs.
- Enhanced system performance through **iterative optimization** and technical evaluation.

SKILLS

Programming Languages: Java, Python, JavaScript, SQL

System Design & Architecture: Scalable Systems, Distributed Computing, Database Design, System Optimization

Backend Frameworks & Technologies: Spring Boot, Flask, Node.js, REST APIs, Microservices

Databases & Data Systems: MySQL, PostgreSQL, Data Pipeline Architecture

Cloud & Enterprise Systems: Cloud Computing Concepts, Scalable Infrastructure, System Reliability

Leadership & Professional Development: Team Mentoring, Project Coordination, Learning Agility, Cross-functional Collaboration

Tools & Development Practices: Git, GitHub, Postman, RESTful API Design, Agile Methodologies
